Stadthospital Waid und Triemli

Women's consultation period in Waid

**Gynaecology
and
obstetrics**

Capable and sympathetic, we're here for you

Ever thought about the enormous changes the female body experiences? We support you at every stage of your life – from the onset of puberty to care during pregnancy to the menopause.

Our services

Gynaecology

- Precautionary examinations, annual gynaecological check-ups
- Contraception and family planning
- Consultation, education and therapy for:
 - Breast-related issues
 - Menstruation-related problems
 - Lower abdominal pain
 - Visible skin changes on genital exterior
 - Gynaecological infections
 - Menopause-related problems
 - Basic investigation of urinary incontinence
- Investigation, treatment and post-treatment care for gynaecological cancers
- Ultrasound examinations (mammary and internal genital)

Obstetrics

- Pregnancy consultation
- Pregnancy check-ups, including
 - First trimester test with nuchal scan
 - Diagnosis of developmental disorders, organ screening
 - Doppler ultrasound
- Consultation regarding prenatal diagnosis

If special investigations or operations are necessary, these will be performed in the Triemli Gynaecology and Obstetrics Clinic.

Information

The team

An experienced team of specialist doctors and medical assistants are on hand to provide you with capable and sympathetic support in gynaecological matters and examinations and in obstetrics-related matters.

From left to right: **Merita Kqjiku**, Medical Assistant; **Dr. Ana Baños**, Senior Physician; **Dr. Leila Ghazala**, Senior Physician; **Dominice Hänni**, Medical Assistant
