

# Fehraltorf energy network

## Pricing

### Connection

With a connection to the energy network, we supply you with 90 per cent renewable energy for heating and hot water production.

### Preparing for the connection

We lay a supply line into your properties, at a one-off cost and with no further obligation. We do not begin supplying energy until the time of your choosing. That could be when you replace your heating system, for instance.

### Subsidies

Please remember it is your responsibility to apply for funding for your connection to the district heating network. Funding always goes to the owner(s) of the property.
