Seefeld lake heat network, Klausstrasse area
Pricing

Connection
By connecting to the energy network, you're involved from the outset and benefit from environmentally friendly heat and cold produced from 100 per cent renewable resources.

Preparing for the connection
We lay a supply line into your properties – at a one-off cost and with no further obligation. The energy supply does not begin until the time of your choosing. That could be when you replace your heating system, for instance.

Example calculation: connection to heat supply

Annahmen	
Assumptions	250 kW
Energy consumption per year	600,000 kWh
Number of homes	50
One-off connection fee	determined on an individual basis
Base price	CHF 58,250 per year
Price for heating	CHF 84,600 per year
Energy price, total (without taking the one-off connection fee into account)	**CHF 0.238 per kWh**
Cost per home	CHF 2,856 per year CHF 238 per month
Proportion of renewable energy	100%

Outlook for the introduction of uniform district heating fees
By merging all public thermal grids with ewz, the aim is to create a uniform fee model – regardless of area and energy source. The basis for the new model is currently undergoing parliamentary discussion in the City Parliament. As a result, the fees for this supply area could tend to be lower in the future than they are today. Once the fees have been set (expected to apply from 2029), you will be notified in good time and can decide whether you would like to switch to the new fee model.

Connection fee in CHF

Depends on the connection and system costs

Base prices

Base price for heating	CHF 233 per kW per year
Base price for cooling	CHF 110 per kW per year

Prices for heat and cooling

Heating (from 100% renewable energy)	CHF 0.141 per kWh
Cooling	CHF 0.102 per kWh

All prices are index-linked and exclude VAT.
