

Remuneration for electricity feed-in City of Zurich and canton of the Grisons

Remuneration for electricity feed-in from the following power generation plants:

- Solar power plants (excl. plants on the ewz solar power exchange)
- Hydroelectric power plants
- Combined heat and power plants

Solar power plants that feed into the ewz distribution grid:

		Peak tariff (Mon–Sat, 6:00 am–10:00 pm)	Off-peak tariff (All other times)
Electricity feed-in	Prices excl. VAT	8.50 ct/kWh	4.45 ct/kWh
Solar subsidy	Prices excl. VAT	2.00 ct/kWh	2.00 ct/kWh
	Prices incl. VAT	11.35 ct/kWh	6.97 ct/kWh
Remuneration for environmental value added* (certificate of origin) for solar panels	Prices excl. VAT	3.00 ct/kWh	3.00 ct/kWh
	Prices incl. VAT	3.24 ct/kWh	3.24 ct/kWh

* All other power generation plants on request.

All other plants:

		Peak tariff (Mon–Sat, 6:00 am–10:00 pm)	Off-peak tariff (All other times)
Electricity feed-in	Prices excl. VAT	8.50 ct/kWh	4.45 ct/kWh
	Prices incl. VAT	9.19 ct/kWh	4.81 ct/kWh

For renewable power generation plants put into operation before 1 January 2006, the provisions on additional cost financing (ACF) pursuant to Art. 73 (4) of the Energy Act apply.

Hydroelectric power plants (until 31 December 2035): 15 ct/kWh (excl. VAT)

Key points

- The Energy Ordinance governs remuneration for the feed-in of electricity from renewable energy installations (power generation plants) and combined heat and power plants pursuant to Art. 15 of the Energy Act.
- It does not apply where the purchase of electricity has been contractually agreed with the operator of a plant.
- Remuneration is paid only for the surplus energy fed back into the grid (self-generated power – internal requirements ≥ 0 , netted in real time).
- Based on the safety regulations and grid conditions, ewz decides on the technical conditions that must be met for the power generation plant to be operated in parallel with the distribution grid. The details are set out in the contract.
- Energy import, generation and feed-in are measured separately.
- The energy generation and feed-in amounts are read and settled periodically, at least once a year
- Remuneration for environmental value added is paid if the plant is registered with Pronovo and a mandate for the ongoing transfer of certificates of origin to ewz has been set up and confirmed.
